Skills

- Management Skills
- Creativity
- Digital Marketing
- Negotiation
- Critical Thinking
- Leadership

App Development

- Flutter App
- AI integration with Dockerized application with fastAPI in Azure Clusters Environments.

Work Experience

Student Worker | Thesis

DTU Health Tech — 2025 – 2026

- Developed two mobile applications targeting 4M+ population through their digital mails in Denmark.
- Collaborated in a team using Flutter and Kotlin.
- Led development from Figma design to MVP, achieving a 76/100 usability score in pilot testing.
- Analyzed active user data to support research-based studies.

Contact: Jakob E Bardram, Prof Department of Helth Tech, DTU

Software Engineer – ERP Applications

Flytmig.dk, Søborg / København NV — 2024

- Engineered GraphQL data models and actions to improve system responsiveness.
- Built optimized TypeScript components to enhance UI/UX performance.
- Developed data-driven user interfaces, collaborating with product and QA teams to deliver scalable features for real users.
- Conducted code reviews and maintained clear cross-team documentation.

Contact: Katimbo Henry (CEO) – +45 50 12 57 32

Frontend Engineer – Data-Driven Interfaces

GymRevenue (Silicon Valley, USA) — 2023

- Contributed to dynamic dashboards and visualizations using Vue.js with Typescript for real-time user metrics.
- Collaborated with product and QA teams to ensure exact ERP solution developments.
- Led UI development with other full-stack developers and managed issue tracking via GitHub and Jira.
- Actively reviewed for peer submission from the other team members and solved, discussed git issues together received from the QA team.

Contact: Ron Merryman (COO) – ronaldmerryman@gmail.com

Frontend Development

- Frontend Development
- React, Redux
- Vue.js, VueX
- JavaScript (Expert)
- TypeScript (Advanced)
- HTML/CSS (Expert)
- Web Animations (Expert)

Backend & APIs

- REST APIs (Laravel, FastAPI, Spring)
- GraphQL
- Django
- Node.js (implied from full-stack JS experience)

Data & Analytics

- Data-driven UI & dashboards
- Product collaboration (QA, Product, Designers)
- Performance optimization
- Leadership

DevOps & Tools

- Git / GitHub Actions (CI/CD)
- Jira, Slack
- Jenkins and Dockerization
- Azure and Aws EC2 services

Other Skills

- Problem-solving & debugging
- Cross-functional collaboration
- System design fundamentals
- kørekort — B (Driver's License)

Communications

- English (Fluent and professional)
- Danish (Prøve i Dansk 3) - module 2
- Urdu/Hindi
- Bengali

Full Stack JavaScript Developer – Data Systems & Automation

SEBPO, Marlton, NJ, USA (Hybrid) 2020 – 2023

- Designed and deployed full-stack data pipelines for reporting and visualization.
- Collaborated with cross-border teams to translate business needs into scalable tech solutions.
- Implemented CI/CD workflows using GitHub Actions to optimize release cycles.

Contact: M. Tawheed (Project Manager) – +880 1733 274923

Software Engineer

Mindscape LTD, Gulshan, BD 2018-2020

- Developed and maintained core backend services within an agile software ecosystem.
- Built and enhanced the digital survey web platform to support large-scale user interactions.
- Integrated secure payment gateway solutions to streamline transaction workflows.
- Tech Stack: Laravel, PHP, jQuery, Blade, CSS, AJAX, JavaScript, Android Native (Java), MySQL.

Education

Technical University of Denmark 2024-2026

MSc in Computer Science and Engineering

North South University 2013-2018

Bachelor's of Science in Computer Science and Engineering

Hobbies and passion

- A guitarist/drummer for 2 bands since 2011
- Badminton - became urban champion in tournaments 2017
- Go on long drive
- Swimming and Fishing.
- Cycling in summer and skiing in the winter
- Making my own IOT devices, can fix basic stuffs for cars and motorbikes.
- Can speak more than 5 languages. Bengali, Hindi, Urdu, English, Serbian and Albenian (brought up in Serbia). Learning is another passion.
- Have a magical cooking hand.
- Cognitive training and problem solving.

Achievements

- 30% faster system load times thanks to front-end and cache data optimisation.
- developed ERP features and scalable dashboards that are utilised by 30million+ (actual clients).
- CI/CD pipelines were implemented to increase deployment dependability and speed.
- Created a mobile application and healthcare recovery software for patients at DTU HealthTech's hospitals (Herlev, Frederiksberg, and Gentofte) with the goal of conducting a 5 million population study using mCAT. (Targeted 200000 users per month via digital post)
